

THERMAL BINDING COVERS PLASTIC REPLACED WITH PAPER

ECO COVERS FROM BINDOMATIC

Actively reduce your environmental footprint with Bindomatic's innovative ECO option for document binding covers.

ECO covers come with a front made of naturally transparent paper instead of plastic and is an option for Bindomatic's Classic, Aquarelle, Aquarium, and Agility covers.

Depending on product, the papers and cartons used in Bindomatic covers are from sustainable forests and produced in mills that are certified according to FSC

and PEFC or EFC Chain of Custody and ISO 14001. Sustainable forests are managed ecologically with biological diversity and sustainability. The papers used are produced with chlorine free (ECF) pulp and are fully recyclable, compostable and biodegradable. Bindomatic strives to continuously employ the most energy-efficient transportation possible in delivery of products and services to customers world-wide.
